

Data Privacy and Security Policy

1. Customer Data Handling

Customer data is confidential and access is strictly limited to authorized personnel only. Data must be encrypted at rest and in transit.

2. Access Controls

Role-based access control policies enforce permissions. Unauthorized access attempts are logged and investigated.

3. Incident Reporting

Security incidents must be reported within 2 hours to the security team. Response plans are activated immediately.

4. Employee Responsibilities

All employees must complete annual data privacy training. Non-compliance results in disciplinary action.

5. Data Retention and Disposal

Customer data retention follows legal and regulatory requirements. Secure data disposal methods must be used for obsolete data.
