

Retail Sales Policy

1. Sales Recording Accuracy

All retail sales must be recorded in the system immediately upon transaction completion. Delays in recording sales beyond 24 hours are not permitted. It is critical to maintain 100 percent accuracy in sales data for inventory and revenue tracking. Any discrepancies found during audits require reporting within 48 hours and corrective actions within 7 days.

2. Pricing and Discounts

Product pricing must adhere strictly to the approved price list. Discounts exceeding 15 percent require manager approval. Unauthorized discounting is subject to disciplinary action. Effective promotion dates must be accurately reflected in the system to prevent pricing conflicts.

3. Sales Return Procedures

Returns must be processed within 14 days of sale date, with valid proof of purchase. Returned products must be inspected for condition and restocked if acceptable. Refunds should be authorized within 3 business days. Return rates exceeding 5 percent of total sales trigger additional review.

4. Employee Sales Performance

Employees are evaluated monthly based on sales volume, customer feedback, and compliance with sales protocols. A minimum sales achievement of 80 percent of personal targets is required to maintain good standing. Failure to meet targets for three consecutive months results in performance review.

5. Customer Data Protection

All customer data collected during sales must be handled confidentially. Access to customer information is restricted to authorized personnel only. Breaches of data privacy will result in immediate investigation and potential legal consequences.
