

Data Privacy and Security Policy

1. Customer Data Protection

All customer information is stored in encrypted databases with restricted access. Access is granted only to authorized employees who have signed confidentiality agreements.

2. Data Retention

Customer data is retained for a minimum of 5 years following last account activity unless otherwise required by law. Data older than this is securely deleted.

3. Access Monitoring

All access to sensitive data is logged and reviewed monthly. Unauthorized access attempts trigger alerts and investigations.

4. Employee Training

Employees receive annual training on data privacy laws and company policies. Compliance certifications are tracked.

5. Incident Response

In case of a data breach, the incident response team must respond within 24 hours. Notification to affected customers and regulators is mandatory within 72 hours.

6. Device Security

Company devices must have full disk encryption and updated antivirus software. Remote wipe capabilities are enabled for mobile devices.

7. Third-party Access

Third-party service providers with data access are required to sign data processing agreements and undergo security audits.
