

Sales Operations Manual

1. Sales Targets

Each sales employee is assigned monthly sales targets based on region, product mix, and historical performance. Targets include total revenue, units sold, and new customer acquisitions. Progress is tracked weekly and reviewed in team meetings.

2. Discount Policies

Discounts must not exceed 15% per customer unless approved by management. Unauthorized discounts are subject to review and possible disciplinary action. All discounts are logged in the sales system.

3. Order Processing

Orders are processed within 48 hours of receipt. Delays must be reported to customers proactively. Order status updates are sent via email and SMS. Accuracy of order details is critical to avoid returns.

4. Customer Credit Checks

Prior to approving postpaid plans, customer credit is evaluated. Customers with credit scores below 600 require manager approval. High risk customers may be required to pay deposits.

5. Reporting and Analysis

Sales data is compiled daily to provide insights on performance trends, product popularity, and regional growth. Weekly dashboards are reviewed by management.

6. Product Promotion Guidelines

Promotions are coordinated centrally and run for defined periods. All promotional offers must comply with company guidelines and legal requirements. Marketing materials require prior approval.
